

Perio Management Consultants - Practice Growth Worksheet

Find Out How Much Your Practice Can Grow!

How would you like to add to your bottom line
without increasing overhead, adding additional staff, or needing to rely on a constant stream of new patients?

Implement "Comprehensive Care Training" in your practice and you'll see thousands of dollars per year added to your bottom line as you start to get reimbursed for the higher standard of care your patients deserve.

Why settle for break-even hygiene?

Use the worksheet below to calculate how you can increase revenues using "Comprehensive Care Training"

- Step 1: _____ Insert your average current daily hygiene production
- Step 2: _____ The average dental practice's production increases 35% using "Comprehensive Care Training." Calculate your new goal by multiplying the figure in Step 1 x 1.35 **
- Step 3: _____ This is the additional revenue your practice can bring in each day. (Subtract the figure in Step 1 from the figure in Step 2)
- Step 4: _____ Insert your average number of hygiene days per week here
- Step 5: _____ This is the additional revenue your practice can bring in each week. (Multiply the figure in Step 3 x the figure in Step 4)
- Step 6: _____ Insert your average number of weeks of production per year
- Step 7: _____ **This is the *additional* hygiene revenue you can bring in each year.** (Multiply the figure in Step 5 x the figure in Step 6)
