

Advanced Foot and Ankle of Indian River Patient Portal

Join the new generation of patients who are taking a more active role in managing their health and wellness. Access your personal medical records, communicate with your doctors via secure online messaging, and make more informed decisions about your health!

To sign up for a portal account today, please give our receptionist your email address so they may send you an invite.

1. What is a Patient portal?

A patient portal is a secure online website that gives patients convenient, 24-hour access to personal health information from anywhere with an Internet connection. Using a secure username and password, patients can view and update health information such as:

- Insurance Information and demographics**
- View Current prescription list**
- Request prescription refills**
- Request appointments or cancel a current appointment**
- Update your contacts, emergency contacts, and providers**
- Access visit notes once they are signed off by the providers**
- View Care plans**
- Review lab results after seeing the physician**
- Send a text message to practice**
- View vital signs log**

With your patient portal, you can be in control of your health and care. Patient portals can also save your time, help you communicate with your doctor, and support care between visits.
