TELEHEALTH:
Telehealth involves the use of medial information exchanged from one site to another via electronic communications. Providers provide services using an interactive audio/video telecommunication system that permits real-time communication to persons who are at some distance/restricted from the provider. The purpose is this telehealth service is to enable patients to receive medical care by a provider. I understand that for this encounter, electronic systems used will incorporate network and software security protocols as approved by Federal and State regulations, to protect the confidentiality of patient identifications, imaging data and will include measures to safeguard the data, to ensure its integrity against intentional or unintentional corruption. I understand and acknowledge that security protocol could fail, causing a breach in privacy of person medical information. Your provider may recommend a visit to an office or hospital for further evaluation. I understand that I have the right to withhold my consent to the use of telehealth in the course of my care at any time, without affecting my right to future care or treatment.
