Well Child Visits and Immunizations

We recommend regular well child visits for children of all ages, as recommended by American Academy of Pediatrics. You can review AAP recommended well child visit schedule [here](#).

We follow American Academy of Pediatrics and [Bright Futures Guidelines](#) for growth and development evaluation, age appropriate medical screenings and behavioral assessment and anticipatory guidance during well child visits.

We recommend all immunizations as per AAP recommendations but are open to discuss any concerns you may have regarding vaccinations. We recommend annual flu vaccinations starting at age 6 months. You can review immunization schedule [here](#).

Same Day Acute Care

- We offer same day acute care visits including virtual visits when possible.

- Injuries: Sprains, cuts and lacerations, collar bone fracture, finger injuries, and initial stabilization of the fractures

- Allergies (and allergy testing)
- Autism
- Cerebral Palsy
- Congenital Heart Disease
- Developmental Delay
- Diabetes
- Down syndrome/other Genetic Conditions
- Epilepsy and Seizures
- Growth Problems
- Hearing Problems
- Speech Delay/Developmental delay/Autism screening and full diagnosis

Medical Home and Care Coordination

"The American Academy of Pediatrics describes the medical home as a model of delivering primary care that is accessible, continuous, comprehensive, family-centered, coordinated, compassionate, and culturally effective care."

We partner with families to provide a medical home for children with special health care needs and coordinate their care with different pediatric sub-specialists and at Children's Hospital, Seattle and Sacred Heart Children's Hospital, Spokane.
