

At My Braces Doctor we understand that our patients are busy and we work hard to provide appointment times that are convenient for you and your family.

In order to give our patients the majority of their appointments during “prime time” (after school and work hours), we schedule your longer appointments (such as bonding braces, repositioning braces and braces removal appointments) during the school or work day. Since these appointments are the longest appointments, we schedule them during the day to give you more flexibility in scheduling the majority of your other appointments (regular adjustments and check up appointments) during the most desirable times.
