

Office Policies

Insurance

We ask that all our families that have insurance make sure their policies are active and to call or bring in any new insurance information prior to, or at the time of, any office visit. We bill all patients and families who have health insurance in accordance with the requirements of their health insurance coverage. In today's complicated health insurance market, it is difficult for patients and families to understand how their insurance coverage works. We are obligated by law and by insurance contracts to code and bill for visits in accordance with the policies set forth by each health insurance carrier. Insurance company contracts determine how we must apply copays, coinsurance, and deductibles, and require that we collect from our patients that cost-sharing component. We require all families and patients to pay any and all fees due and payable on the date services are rendered.

Newborns

Insurance companies generally only allow 30 days to add your newborn to your insurance plan. Please call ASAP to get this done. Once you receive your child's card, please provide us with a copy. If you fail to add your baby to your plan, you will be financially responsible for all visits.

Patients Without Insurance Coverage

We are happy to work with families that prefer to pay directly for services or do not have insurance. For such patients we must collect payment at the time of service. We provide vaccines free of charge through the Vaccines for Children (VFC) program. However, each vaccine administration cost is \$19.93 per vaccine and must be paid at the time of service.

Divorced/Separated Parents and Custodial Agreements

PTPEDS does not get involved in disputes between divorced, separated or custodial parenting arrangements regarding financial responsibility for their child's medical expenses. By signing as guarantor below, you agree to be financially responsible for the care we provide to your child, regardless of whether a divorce decree, custodial or other arrangement places that obligation on someone other than yourself. We are happy to provide receipts for paid medical bills for you as requested. Parental decision making for divorced parents regarding medical care should be agreed on prior to any visits. As a practice we will not interfere in these decisions, but additional visits may be required if timely agreements cannot be met at time of service.

Yearly Registration

Registration will be updated every year at the first of the year. We will send out electronic registration in January. If we do not have a current registration, we will reach out the week before your appointment to have this completed. If this is not updated prior to the appointment, parents will be asked to complete an electronic form upon check-in for their appointment.

Patient Portal

We require all patients to have a PTPEDS online portal for communication. This allows us to communicate appointment information and allows parents/patient to request forms and medication refills.

Billing and Vaccine Companies

Billing services are provided by PedsOne, located in Vermont. For all of your billing questions please contact them at 1-866-371-6118.

Vaccine are provided and billed by VaxCare. We must have a current insurance on file that we are able to confirm through their online website. If we are unable to verify insurance or if the insurance is showing inactive, we request payment at the time of service for the full cost of the vaccines and administration. You may receive communication or billing from Vaxcare if your insurance does not cover vaccines or is found to be inactive.

Appointments

Well Check-ups are required

At PTPEDS, we feel strongly about children having routine check-ups. These visits allow us to monitor for growth, developmental, behavioral and academic issues so that we can identify them early, intervene, and treat them effectively. Per the American Academy of Pediatrics, children should receive preventative care at the following ages:

- 1month of age, 2mo, 4mo, 6mo, 9mo, 12mo, 15mo, 18mo, 24mo, 30mo, then yearly from 3-22 years of age.

We expect parents to follow these guidelines so that we can provide quality healthcare to our patients. Failure to do so may result in being discharged from our practice. Documents and school forms will not be completed for patients who are behind on well checks.

Screenings

We perform recommended screenings based on the patient's age to detect any conditions that may need treatment. Most insurance plans cover these screenings and costs; however, some recommend the screening but push costs to the patient's deductible/co-insurance. Some do not cover the recommended screening at all. It is a parent's responsibility to understand which screening services are covered by your specific insurance plan.

Screenings

- Edinburgh Postpartum Screening
- Ages and Stages Questionnaire (development screening)
- MCHAT (Modified Checklist for Autism in Toddlers) at 18mo, 2yr
- Spot Vision Screening 1yr – 5yr
- Lead and TB exposure questionnaire
- Hearing and vision screening
- PHQ-9 Depression screen
- GAD-7 Anxiety screen

Well Check-ups vs. Problem-Oriented visits

Well visits may reveal problem-oriented issues that require evaluation and management (for example, ear infections, ADHD concerns, Anxiety and Depression). Insurance company billing policies then prompt charges for both categories when there is an added diagnoses to the well appointment. While well checks/preventative services may not require a co-pay or deductible, problem-oriented services do. If you need further explanation about incurring additional fees for services provided during your visit, please speak with our billing team.

Chronic medical conditions require follow up

Chronic medical conditions such as ADHD, asthma, depression, and anxiety require frequent follow up to ensure the best care possible for your child. Patients with ADHD need follow up every 3-4 months once they are stable on their medication. Other chronic medical conditions need follow up every 3-6 months once stable depending on the child's care plan. Medications may not be refilled unless patients keep their follow up appointments.

Vaccine Policy

Vaccinations are safe and effective in preventing diseases and health complications in children and adults. PTPEDS requires that all patients are immunized according to the current vaccine schedule recommended by the American Academy of Pediatrics and CDC. In order to protect our patients, we do not accept families who don't vaccinate their children. Although recommended, covid and flu vaccines are not part of this requirement. If families have any questions about vaccines, they can speak directly with one of our providers. If your family ultimately chooses not to vaccinate, we will ask you to find a clinic that better aligns with your wishes for your child.

Vaccines given to all patients at our office are inputted into the KYIR (Kentucky immunization registry) system, a service of the Kentucky Department for Public Health that allows individuals, parents and legal guardians to access official immunization records.

Medication refills

Please call the office **1 week** prior to running out of a prescribed medication. Patients must be up to date on their well check visits/med check visits in order for prescriptions to be refilled without the patient being seen in the office. Please allow 2 business days for these to be processed.

CONTROLLED SUBSTANCE REFILLS

If requesting a refill for an ADHD medication we must have the patient's Social Security # on file. Per laws in the state of KY, we are required to obtain a KASPER before medication can be prescribed or refilled. Patients must be seen every 3-4 months in order to have these prescriptions managed by our office. **Medication refill requests must be submitted 1 week prior to running out.**

Mutual Respect of Time

Providers at Poole and Thomas Pediatrics strive to stay on schedule. Although there can be emergency situations that prevent us from running on time, we pledge to provide quality care with minimal wait time to the best of our ability. In order to respect your time, we make the following requests:

- Arrive early or on time for your appointments. If you arrive 10 or more minutes late, you will be asked to reschedule.
- If you plan on having additional children seen at your appointment, please let us know in advance so we can better accommodate your family.
- If you are running late, please call the office. We may be able to accommodate you with advanced notice.
- Three (3) "no-show" appointments without notice from you in one year may result in dismissal from our practice.
- New patients who no show without notice to their first appointment may not be scheduled for additional appointments.

Additional Fees

No-show/late fee: We have many patients in our practice and all are important to us. Missing an appointment without giving prior notice to the practice deprives other patients of the chance to take that appointment slot. Therefore, we require no less than 24 hours' notice for all cancellations of pre-scheduled visits. If you cannot notify our office in a timely manner, a no-show fee of \$35 will be charged to the patient's account and must be paid before rescheduling.

Phone triage: After hours, we offer a telephone triage consultation service that puts you in touch with a pediatric trained triage nurse. Families will be charged for each triage call made (\$16). There are exceptions for advice given for infants less than 90 days old or where recommendations are given to immediately be seen by a healthcare provider. Additionally, if a provider speaks with a parent directly after hours or on the weekend, the call will be billed to your health insurance.

Paperwork Requests

Please allow 2 business days for any paperwork to be processed and returned. FMLA paperwork is extensive and time-consuming. There is a \$25 fee for our office to complete requested FMLA paperwork.
