## IMMUNIZATION POLICY

Immunizations are a scientifically proven way of protecting children from serious and life threatening communicable diseases. In accordance with the guidelines established through the American Academy of Pediatrics, the Centers for Disease Control (CDC) and the United States Public Health Service, we advocate for every child to receive the required vaccines.

Recommended resources that meet the criteria for credibility and content as defined by the Global Advisory Committee on Vaccine Safety are listed below:

<https://www.chop.edu/centers-programs/vaccine-education-center>

<https://www.cdc.gov/vaccines/index.html>

<https://www.ecbt.org/>

Children deserve to receive only the best evidence based Pediatric care, and it is our obligation to protect every single one, including infants and children that cannot receive vaccines for medical reasons. For all the above reasons, our office only accepts patients that are immunized and/or working towards being fully immunized within the recommended intervals.

We are always happy to answer your questions and to discuss any concerns you may have.
