

# TRANSFORM YOUR BODY

WITHOUT SURGERY  
OR DOWNTIME.

The non-surgical body contouring  
treatment that freezes away stubborn fat.

[coolsculpting.com](http://coolsculpting.com)

# REVEAL THE REAL YOU

and show off  
the body you've  
always dreamed of.

## CAN YOU PINCH AN INCH? OR TWO? OR THREE?

The ugly truth is, we all have stubborn fat. And as we age, gravity and genetics only make things worse. Proper diet and exercise are not enough to keep these unwanted bulges at bay. CoolSculpting® is the solution for getting back the body you want, without surgery or downtime.

## GET THE BODY YOU WANT THROUGH **SCIENCE THAT WORKS.**

A simple observation led to life-changing technology.

Developed by renowned Harvard University scientists, Dieter Manstein, MD and R. Rox Anderson, MD, CoolSculpting technology was born of the observation that some children got dimples due to eating popsicles.

The idea that cold can selectively affect fat cells was the insight behind Cryolipolysis, the proven science on which CoolSculpting is based.

Schedule your  
consultation **today!**

## COOL TECHNOLOGY. EVEN COOLER RESULTS.

CoolSculpting® is a revolutionary non-surgical contouring treatment that freezes stubborn fat, which then is naturally eliminated from your body. No needles, no surgery, and most importantly, no downtime. It's safe, FDA-cleared, effective,

and does exactly what it's supposed to do.

**NO NEEDLES,  
NO SURGERY,  
NO DOWNTIME.**

## A TREATMENT PLAN THAT LEADS TO TRANSFORMATION.

During your consultation, your CoolSculpting provider will develop a customized **Treatment to Transformation™** plan to address your specific areas of concern. This comprehensive approach may involve multiple treatments or visits and is designed to optimize your CoolSculpting results.

Ask your provider about  
**Treatment to Transformation.**

# »»»»» HERE'S THE SKINNY ON HOW COOLSCULPTING® WORKS:

**1)** Many of us have fatty areas that resist diet and exercise.

**2)** CoolSculpting uses controlled cooling to target and crystallize fat cells.

**3)** CoolSculpting only affects fat cells.

**4)** After treatment, the crystallized fat cells are gradually removed by the immune system.

**5)** In the weeks and months following treatment, remaining fat cells condense, reducing the fat layer.

**6)** Fat layer reduction in targeted area leads to an improvement in appearance.

## What happens AFTER your CoolSculpting treatment?

Before treatment  
(Abdomen and flank)

After treatment, targeted fat cells are eliminated resulting in fewer fat cells in treated area.

(No changes occur in fat cell distribution in untreated areas.)

Results and experience may vary.
