

Romanson Dental Care

PATIENT NEWSLETTER

Produced for the Patients of Dr. Rand Luka and Dr. Paul Romanson

Winter 2014

from the dentists

Our beautiful fall season is now behind us and days are becoming shorter and colder, a sure indication that winter is around the corner.

We all know that the holiday season is approaching quickly, and your schedule will become busier in the next few months. We really enjoyed seeing you and feel honoured that you have chosen us and our team to help you achieve

optimal dental health. You have put your trust in us and we would like to say thank you to all of our patients for their dedication and loyalty.

Our goal is to help keep your appointments and maintain healthy smiles throughout the season. We are here to help you with any concerns that you may have. Please call or email us any time.

*Yours in good dental health,
Dr. Luka & Dr. Paul*

Wishing you the gifts of the season...

*Peace,
Hope & Joy!*

During this holiday season, our thoughts turn gratefully to our patients who have made our progress possible.

We Have Some Winners! Patient Appreciation Draws!

sedation
dentistry!

What's New at the Office?

Ensuring that you feel safe, relaxed, and comfortable at every visit is our priority. If you feel apprehensive about dental treatment, please let us know. We now will be offering the option of Nitrous oxide during certain dental procedures. **Nitrous oxide** also known as laughing gas is a safe and effective sedative agent that is mixed with oxygen and inhaled through a small mask that fits over your nose to help you relax. It is not intended to put you to sleep. You will be able to hear and respond to any requests or directions the dentist may have. Before selecting this sedation, we will discuss your needs, your medical history and your current health with you. Patient safety is always a top priority and we will do all that we can to ensure that you enjoy a pleasant experience and a healthy smile.

Smile with Dental Implants

Dental implants have been successfully placed in millions of people worldwide as a treatment option for missing teeth and securing dentures. Dental implants act as an artificial root and are the closest substitute to a natural tooth. Dr. Luka has completed the residency Program for Implant Dentistry and can surgically place dental implants right here in our office. Once integrated into the jaw it can be restored with a beautiful crown and/or secure your denture. Please ask our dental team if you have any questions about dental implants and how they might work for you.

Welcome

Enas, Dr. Luka's wife, has recently graduated from the Dental Assistant, Level II program at *Medix School* and has now joined our dental team. Enas is honoured to join our team and looks forward to getting to know all the patients.

Congratulations

Karen has been a very passionate and dedicated employee with *Romanson Dental Care* for many years. Karen has shown her compassion to the dental field in her job as a dental hygienist and as a mentor to our dental team and patients. She enjoyed growing with our patient's families and sharing her knowledge as a parent, friend and professional. We will truly miss seeing Karen in the dental office. Congratulations, and enjoy your retirement.
