

SHAVE BIOPSY WOUND CARE INSTRUCTIONS

- Do not get the wound wet for 48 hours after the procedure
- After the first 24 hours, remove the outer bandage
- Gently cleanse the area with mild soap and water
- Apply a small amount of Vaseline or Aquaphor to the area. Do not use any other topical ointment or cream unless instructed.
- Cover the area with a band-aid or non stick gauze and tape
- Continue this wound care once a day until the site is completely healed
- It is advised that you avoid any strenuous activities that may affect the surgical site for 2 weeks
- If the area becomes red, swollen, and painful or there is a noticeable amount of discharge or oozing please call (918) 760-0700.
- If you have not received your pathology results within two to three weeks please call the office at (918) 760-0700.
