*Posterior Thighs & Buttocks: 2 zones

*Love Handles and Abdomen: 2 zones

*Abdomen: 1 zone

*Love Handles: 1 zone

*Anterior and Posterior Thighs:2 zones

*Buttocks: 1 zone

--*After the initial series of sessions, more sessions may be done. This can be done if more aggressive results are desired.

--*We recommend repeat therapy based on desire to increase results and/or maintenance single sessions.

--*The interval can be extended significantly after the initial series. This is more based on patient preference. Many studies suggest ongoing collagen formation up to 6 months after completion of a series of sessions. .

>With **ST (skin tighetening/ Refirme)** Syneron emax 75\$ for around eyes when done with Venus Legacy

or

>With **1540 nm laser \$125 with Legacy**

VENUS

LEGACY

-Advanced Technology for

TIGHTENING wrinkles of the face and neck.

-Effective therapy on the arms, abdomen, thighs, and buttocks for **REDUCTION** of **ADIPOSE/FAT/CELLULITE**

and **SKIN TIGHTENING**

-The **Multi-Polar RF** delivers Fast, Pain Free, Homogeneous Heating to multiple tissue depths resulting in superior clinical outcomes.

-**Pulsed Magnetic Fields** technology has been used in traditional medicine for decades and is scientifically proven with regard to its regenerative properties.

-**Vari-Pulse** allows adjustable pulsed suction for deep energy penetration, lymphatic drainage, as well as stimulating circulation.

-**Real-Time Thermal Feedback** integrates a hands-free thermometer with an on-screen visual feedback graph to allow for constant tissue contact for overall better clinical results.

Syneron ST: \$75 add on if doing upper lip and periocular regions
1540 nm Laser for upper lip or periocular regions add \$125.

Greater Des Moines Dermatology

Timothy Abrahamson, MD 8 2021

Jake Lorsung PA-C

VENUS LEGACY® is unique technology that comfortably, safely, and effectively reduces cellulite/fat/adipose, treats wrinkles, reduces thigh and abdomen circumference and tightens skin. This device can also be used to treat stretch marks and tighten skin. Used on both the face and body, Freeze treatments typically take under 30 minutes per site and results can be seen immediately. Effects improve even more 2-3 months after completion of treatment course.

>The LEGACY® uses **(MP)² radiofrequency** and **magnetic pulse** along with **varipulse** and **real time monitoring** to stimulate tightening and produce collagen formation via fibroblast stimulation. Treatments are for face, neck, buttocks, abdomen, thighs, love handles, hands/forearms, and upper arms. Looking great isn't just a dream, it's painless and it can be done under an hour.

>The LEGACY ® is a **unique, painless but warm/hot treatment that targets fat/adipose, cellulite, wrinkles, stretch marks, and loose skin.** Reduce, smooth and tighten your face and body and begin to be the younger you.

>The demand for non-invasive aesthetic treatments has increased dramatically in the past few years. We need effective treatments that deliver excellent clinical results that are comfortable and safe but without downtime.

-The **VENUS LEGACY®** is a revolutionary technology that offers non-invasive skin tightening, cellulite reduction and circumferential fat reduction.

-The **VENUS LEGACY®** harnesses the remarkable power of multi polar radio frequency (RF) combined with pulsed magnetic fields to create what is known as **MP²**. This unique combination has the ability to penetrate deeply, quickly comfortably and safely into the skin achieving optimum results. Patients can just

relax during the treatment feeling only a warm to slightly hot sensation.

-The procedure does create warm heat but does not require any cooling agents. However, if sensitive patient, topical anesthetics are an option: For Face or Neck, using a numbing cream "solarcaine with aloe" otc or "generic EMLA" www.goodrx.com/emla rx starting 30 minutes before the procedure every 10 minutes makes face, eyelids, and neck therapy more comfortable..

It's also faster than other comparable treatments. Most treatments can be done in 30 – 60 minutes. FDA cleared for facial wrinkles and rhytides and Health Canada cleared for temporary reduction of cellulite and skin tightening.-

Greater Des Moines Dermatology and Dr. Abrahamson now offer this cutting edge technology without downtime! You can go back to work right afterward.

Contraindications:

As this device uses radiofrequency, it is **NOT** advised for patients with pacemakers or defibrillators or other **implants electronic devices.**

-Any metal implants need to be reported and identified before treatment as this is a relative contraindication. Treatment during Pregnancy is **NOT** advised. It is NECESSARY to remove metal implements such as piercings and necklaces prior to therapy.

Venus Legacy Pricing

-Under Eyes (dark circles):

\$1000 * 5 TX Pack, Single: \$250

With Syneron ST: add \$50/session

With 1540: add \$100

-Under Eyes and Eyebrow Lift

\$1,750 * 5 Tx Pack, Single \$400

With Syneron ST: add 50\$/ session

With 1540: add \$100

-For stretch marks and wrinkles, the Venus Legacy can be rotated with the **1540nm NON-ABLATIVE laser** to treat more severe or diffuse stretch marks and wrinkles. The Venus Legacy likely increases skin tightening more while the **1540 nm laser** likely stimulates more collagen formation in the areas.

www.cynosure.com/product/palomar-icon-aesthetic-system

Pricing for 1540nm based on size of area of stretch marks if rotation with Venus legacy.
