Dear Dr. Patel,

As you know my smile was not horrible, but it was far from perfect. It has bothered me for many years. It often made me self conscious and hide my smile. In the past I have attempted to have temporary cosmetic work done to improve my smile. But, that was what it was ... temporary. After receiving your coupon in the mail for a free cosmetic consultation, I thought I would see what you had to offer me.

After deciding to proceed with placement of veneers, I was both nervous and excited. You spent a great deal of time with me explaining the procedure, answering my questions, and making me feel at ease. During the treatment, you provided very personalized and professional care.

Since having the veneers placed I have a new sense of self confidence and happiness with myself. I can smile wide and not be embarrassed. Thank you for what you have done for my smile and my life. I am very happy with the work that was done and will surely recommend you to anyone I know interested in cosmetic dentistry.

Thank you again,

Kimberly A. Roman
