# *Innovative Networking Technology*

## *Core Competencies*

### *CyberSecurity Support Services*

Innovative Networking Technology, Inc. (INT) provides a comprehensive suite of cybersecurity services, especially focusing on obtaining Authority to Operate (ATO) certifications. We specialize in implementing robust risk management frameworks, ensuring compliance with stringent regulatory requirements such as NIST, FISMA, and HIPAA. INT offers cutting-edge solutions for network security, endpoint protection, cloud security, and identity and access management, catering specifically to the needs of government agencies. With our expertise in cloud security, we enable clients to secure their cloud environments effectively while facilitating the acquisition of ATO certifications for their systems and applications.

### *Web Development*

INT offers streamlined web development services for government agencies. Specializing in custom design, development, and maintenance, we ensure user-friendly, secure, and scalable websites. Our expertise covers full-stack development, providing seamless front-end interfaces, back-end systems, and database integration. With a focus on performance and usability, we deliver tailored solutions that meet objectives and exceed user expectations, supported by ongoing maintenance and support.

### *Content and Learning Management*

We deliver tailored content and learning management solutions for government agencies. Our expertise lies in creating efficient learning environments through advanced learning management systems (LMS) and interactive content tools. We streamline training workflows, enhance learner engagement, and track progress effectively. INT empowers agencies to optimize training initiatives and achieve strategic goals with precision.

### *Administrative Services*

INT provides specialized administrative support for government agencies. Our services include procurement, contract management, HR, and financial management, optimizing operations and ensuring compliance. We enable agencies to focus on their core missions efficiently.
