

## Welcome to our office!

*Our practice is devoted to the finest endodontic care in the world.*

As a partner in your care with your general dentist, we seek to give you the best experience possible for all your dental needs. Dr. Carol Mann is an active specialist member of the American Association of Endodontists, which promotes cutting edge dental care and treatment for its members and their patients.

### Endodontics can save your natural teeth

**Endodontics** is the dental science of treating all problems related to the nerves inside the tooth. When this tissue or the tissue surrounding the tooth root is diseased or damaged due to decay, trauma, or periodontal disease, **endodontic therapy** or **root canal** treatment typically can save your tooth possibly avoiding dental implants or bridges.

You may need endodontic treatment, including a root canal, if you experience any of the following symptoms:

- ❖ Oral or facial pain
- ❖ Prolonged dental sensitivity to heat or cold
- ❖ Tenderness of teeth to touch and chewing
- ❖ Facial or oral swelling
- ❖ Discoloration of teeth

### Saving natural teeth is still the best option

**Root canal therapy is a highly effective way of regaining a healthy and comfortable smile.**

- ❖ Most patients who undergo root canal therapy done describe it as **virtually painless**.
- ❖ After restoration, the tooth continues to function like any other tooth.
- ❖ Most people are not aware that root canal treatment is a viable alternative to tooth extraction and implants.
- ❖ **Endodontists are highly skilled specialists in diagnosing and treating tooth pain and performing root canal treatment.**
- ❖ Nearly 15 million teeth are saved with root canal procedures each year.

### A wide range of services, utilizing the latest technology

**Dr. Mann's** expertise includes a wide range of endodontic procedures to save natural teeth including root canals, retreatments, diagnosis and treating cracked teeth, traumatic injuries and Endodontic Microsurgery.

Our office is equipped with the latest in endodontic technology including the operating microscope, the Kodak 3D cone beam scanner, computer generated x-rays, electric handpieces, and ultrasonic handpieces and lasers at our disposal.

**We strive to develop long lasting, trusting relationships with all of our patients and their general dentists. You as a patient, will have a pleasant experience in a relaxing environment.**

Dr. Mann will complete your endodontic treatment in one to two visits. You will then need to return to your general dentist for completion of the restoration.

**Please call 973-761-7003 to make an appointment. We are looking forward to meeting you.**
